

PUTTHIPHOOM BOONMAHATANASOMBUT

Full-Stack Developer

Bangkok, Thailand | putthipoom.bm@gmail.com | +66 80-074-5611
puttpoom.github.io/resume | linkedin.com/in/putthipoom

PROFESSIONAL SUMMARY

Full-Stack Developer with 2 years of experience building web systems for logistics, GPS tracking, and ERP businesses. Owns features end to end — from Go/PHP (Laravel) REST APIs and MySQL schema design through to React frontends — with a strong focus on performance tuning and secure coding (OAuth 2.0, access control). Currently seeking a new Full-Stack or Backend Developer role to take on bigger challenges.

TECHNICAL SKILLS

Languages: Go, PHP, JavaScript (ES6+), SQL
Frontend: React, Next.js, React Hook Form, TanStack Query, Tailwind CSS, shadcn/ui
Backend: Go (Gorilla/Mux), PHP Laravel, REST API, OAuth 2.0, RabbitMQ
Databases: MySQL, MongoDB
Tools: Git, Docker, Bitbucket, Google Maps API, Longdo Maps API

WORK EXPERIENCE

Full-Stack Developer, FreewillFX Co., Ltd. <i>Software house building logistics, GPS fleet tracking, and ERP systems for enterprise clients</i> - Owned full-stack development of a multi-tenant inventory system for concrete plants. - Reduced API response time by ~30% via EXPLAIN-based query tuning and indexing. - Fixed a memory-crash bug in bulk Excel exports by batch-processing stock reports. - Built a Go-based OAuth 2.0 SSO service integrated with PHP applications for single sign-on. - Built a Go program processing real-time GPS data from ~50 delivery vehicles. - Led a full migration of a legacy PHP 5.5 codebase to PHP 8.3 across DEV/QAS/Production. - Built an MVC CRUD system for vehicle and driver data with Excel import/export. - Fixed security issues from a VA scan: access-token authentication and session handling. - Built an on-site terminal app integrating breathalyzer, gate, and plate-camera hardware. - Built a map dashboard for bus routes with real-time passenger boarding counts.	Bangkok Oct 2024 – Present
Frontend Developer, Payment Platform (Contract, Part-time) - Built pages, forms, and navigation for a support ticket system using React and TanStack Query. - Applied existing components to match the team's design system.	Remote Apr 2025 – Jul 2025

PERSONAL PROJECTS

- WhaleDorm: Dormitory Management System** — React, Express.js, Prisma, MySQL
- Built a full-stack dormitory platform with room booking and tenant management features.
 - Integrated Google Maps API, Google OAuth login, and Cloudinary image uploads.
- Shopping Bot: Automated Purchasing Tool** — React, Express.js, MySQL
- Built a Chrome extension automating Lazada purchases with FingerprintJS device tracking.
 - Built an Express.js backend with LINE Bot notifications and node-cron scheduled buying.
- Weather Dashboard** — Next.js, Redux Toolkit, Firebase, Tailwind CSS
- Built a weather dashboard with Next.js, using Redux Toolkit for global state management.
 - Used Firebase Firestore to persist saved locations and user preferences.
